Safety instructions to follow while using insecticides for farmers.

Don't transport the insecticides along with the food material.

Store by lock and key.

Keep out of reach of children.

Buy original packings of insecticides.

Read carefully the label and leaflet before use.

Wear protective clothes.

Take the recommended quantity by measuring appropriately.

Stir vigorously with the stick while mixing with the water.

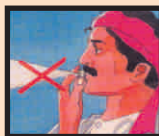

Use funnel for preventing spillage.

Don't use the insecticide containers for storing water or food material.

Spray in the direction of wind blowing.

Don't blow with mouth for cleaning the nozzle.

Don't eat, drink and smoke while spraying.

Don't use the damaged, pierced sprayer or duster.

Clean the body and soiled clothes with water if accidental spillage of the insecticide.

Don't let children spraying.

Don't put food items near the spraying areas.

Clean hands carefully before eating and drinking.

If accidentally effected by the poison of the insecticide, consult the doctor after giving first aid.

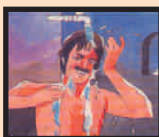

Show the insecticide container leaflet to the doctor.

Immediately start a good treatment.

Break the empty containers and dig the ground and hide in it.

After spraying take a bath and change the clothes.

Take precautions not to pollute the environment.

Keep Warning boards at the spraying areas.

Very poisonous

Highly poisonous

Common poisonous

Mild poisonous
